Design Optimization

50% Service fee refund with Stratasys F900 or Fortus 450mc purchase*

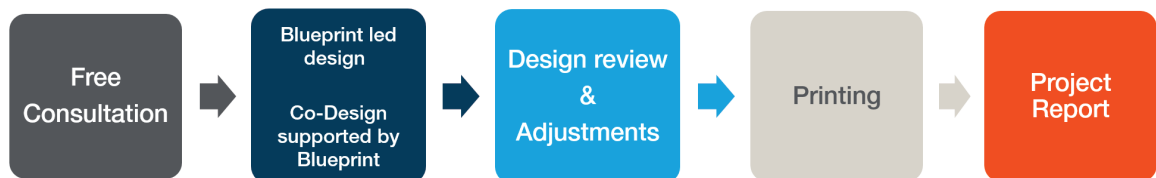

About Blueprint

Blueprint is the world's leading 3D printing consultancy. Since we started 15 years ago, we have focused on helping our clients to make sense of 3D printing.

The fast-paced world of Additive Manufacturing offers a vast array of new design & manufacturing possibilities. Can you be sure that you are utilizing them to their full advantage? Or that your designs are fully optimized for the technology? The experts from Blueprint's Design Optimization team are here to ensure your ideas reach their full potential.

What we offer

- Free initial consultation & quoting on your project
- Full design service or evaluation & Co-Design service
- Design optimization for Additive Manufacturing with parametric CAD
- Reverse engineering
- Make 2D drawing to 3D model conversion
- Manufacturing & assembly instructions
- Expert advice on Stratasys AM technologies
- Manufacturing of final design

Contact us to receive your personalized quote

Please send your request to the Blueprint team at dave.hayden@stratasys.com and we will be in touch. Please include the following information if possible:

- Details of current or expected design (CAD, STL, 2D Drawings, Sketches or Photographs)
- Information on the application and desired outcomes
- Contact information of an appropriate engineer

* 50% of the value of the consulting work to be deducted from the price of the printer. PO for printer order to be received within 6 months of starting the project. Up to 10% of the price of an Fortus 450mc or up to 6% of the price of a Stratasys F900.
