

Medical Bioreactor Adaptor

This adaptor was created to allow a proprietary bioreactor to mate with Distek clients' motors. The shape proved difficult to manufacture with CNC machining, injection molding, or even cast urethane, especially given time limitations. By printing this part on the Origin One with LOCTITE® 3843, our customer Interpro was able to create a durable, high-impact and professional looking part quickly and at low cost per part for their client Distek.

System	Stratasys Origin One
---------------	----------------------

Material	LOCTITE 3843
-----------------	--------------

Build Time	3h 46m
-------------------	--------

Material Used	43.63cm ³
----------------------	----------------------
